- *Database:* Structure design, creation, and maintenance experience with small and large-scale MSSQL, MySQL and Oracle databases. Frequent work with stored procedures in MSSQL.
- *User Interface:* Web, desktop and mobile UI design experience. Ecommerce, data collection and management, and data presentation interface design. Extensive icon development history.
- *Development:* Perforce, CVS, Jira, Eclipse, GNATS bug tracking, UML, and Agile software development.
- *Documentation and business writing:* Both software product and technical/business process.
- *Systems:* Sysad-level interaction with Unix (Linux/BSD/Solaris), Windows, and OS X.
- *Business:* Management (both team and project), cross-team communication, marketing, branding and collateral, corporate social media account maintenance, mailing lists and newsletters.
- *Multimedia:* Adobe After Effects/Premiere, graphics for video, video/audio for web, and compositing.
- *Other Proficiencies:* Photoshop, Illustrator, InDesign, logos/branding, print design.

Experience

Director of Development	Madden Media, Tucson, AZ	Jan. '14 - Present
--------------------------------	---------------------------------	---------------------------

Madden Media has partnered with tourism and travel marketers since 1976 to deliver proven payoff in a rapidly changing travel landscape. Responsibilities include:

- Director of web and mobile development department (directly manage 2 team members).
- Creator of a variety of internal and external web applications, frameworks, and systems.
- Sole developer and maintainer of company's Android mobile applications (over 10 live in the Play Store).
- Lead database engineer for company's RDBMS, which contain several million entries across 6+ databases.
- Lead for R&D work on future technologies and projects related to company interests.

Director at Large	Cataphora Inc., Menlo Park, CA	Jan. '02 – Jan. '14
--------------------------	---------------------------------------	----------------------------

Cataphora specialized in software and services that revolutionized the processing and analysis of social networks within extremely large data sets. Initial employee in the privately-held Bay Area software startup that peaked at 120 employees. Responsibilities included:

- Extensive development of a variety of user interfaces for company software products.
- Creation and development of the design and implementation of the web application portion of the product suite, along with internal intranet sites.
- Responsible for key graphics, multimedia, and data presentations used in both demonstration and live products.
- Co-authored user interface patent with contributions on 4 other company patents.
- Creation of marketing and demo collateral in a variety of formats including print, video and interactive websites.
- Chief Culture Officer for the company, consulting with teams across the company to address and work on corporate culture issues.
